Brief introduction

Thank you for your choosing our products. We are sure you will find your new appliance a pleasure to use. Before you use the appliance, we recommend that you read through these instructions carefully, which provides details about its usage and functions.

- Please ensure that all people using this appliance are familiar with its operations and safety features. It is important that you install the appliance correctly and pay attention to the safety instructions carefully.
- We recommend that you keep this user's manual with the appliance for future reference and retain it to any future users.
- This appliance is intended to be used in domestic households.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a personal responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.

- Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.

WARNING—Keep ventilation openings, in the appliance enclosure or in the built-in structure, clear of obstruction.

WARNING—Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.

WARNING—Do not damage the refrigerant circuit.

WARNING—Do not use electrical appliances inside the food storage compartments of the appliance, unless they are of the type recommended by the manufacturer.

WARNING—When disposing of the appliance, do so only at an authorized waste disposal centre. Do not expose to flame.

WARNING—If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

Important safety instructions

General safety and daily use

It is important to use your appliance safely. We recommend that you follow the guidelines below.

- Store any food in accordance with the storage instructions from the manufacturer.
- Don't try to repair the appliance yourself. It is dangerous to alter the specifications or modify this product in any way. Any damage to the cord may cause short circuit, fire or electric shock.
- Don't place too much food directly against the air outlet on the rear wall of both the refrigerator and freezer compartment, as it affects sufficient air circulation.
- Don't place hot items near the plastic components of this appliance.
- Frozen food must not be refrozen once it has been thawed out.
- Don't store bottled or canned drinks (especially carbonated drinks) in the freezer compartment. Bottles and
- Keep all packaging away from children to avoid risk of suffocation.
- Protect children from being scalded by touching the very hot compressor at the rear bottom of appliance.
- Don't place items on top of the appliance as this could cause injury should they fall off.
- Never allow children to play with the appliance by hanging or standing over or on the doors, racks, shelves and drawers etc.

Safety about electricity

To avoid the risks that are always present when using an electric appliance, we

recommend that you pay attention to the instructions about electricity below.

- We recommend after you unpack the appliance and check through the appliance. Should any damage be evident, don't plug in the appliance but contact the shop immediately from which you purchased it. Keep all packing materials in this case.
- The appliance must be applied with single phase alternating current of 220~240V/50Hz.
- The mains plug must be accessible when the appliance is installed.
- Make sure that the appliance is grounded properly. If still in doubt, call a qualified registered electrician.
- If the fitted plug is not suitable for your socket outlets, it should be cut off and carefully disposed of. To avoid a possible shock hazard, do not insert the discarded plug into a socket. If in doubt contact a qualified, registered electrician.
- Do not use extension cords or multiple sockets which could cause overloading of wiring circuits and could cause a fire.
- Always plug your appliance into its own individual electrical socket which has a voltage rating that matched the rating plate.
- Make sure that the plug is not squashed or damaged. Otherwise, it may cause short circuit, electric shock or overheat and even cause a fire.
- Don't insert the mains plug if the socket is loose, there is a risk of electric shock or fire.

- Switch off the appliance and disconnect it from the mains power before you clean or move it.
- Never unplug the appliance by pulling on the electrical cord. Always grip the plug firmly and pull straight out from the socket to prevent damaging the power cord.
- Don't use the appliance without the light cover of interior lighting.
- Any electrical component must be replaced or repaired by a qualified electrician or authorized service engineer. Only genuine spares should be used.
- Don't use electrical appliances (such as ice cream makers) inside the food storage compartments of the appliance, unless they are approved by the manufacturer.

Refrigerant

The refrigerant isobutene (R600a) is contained within the refrigerant circuit of the appliance, a natural gas with a high level of environmental compatibility, which is nevertheless flammable. During transportation and installation of the appliance, ensure that none of the components of the refrigerant circuit becomes damaged. The refrigerant (R600a) is flammable.

Caution: risk of fire

- Don't store products which contain flammable propellants (e.g. spray cans) or explosive substances in the appliance.

Should the refrigerant circuit be damaged:

- Avoid opening flames (candles, lamps etc.) and sources of ignition.
- Thoroughly ventilate the room in which the appliance is situated.

Service Note

This appliance employs Hydrocarbon Refrigerant type R600a.

It is hazardous for anyone other than an Authorized Service Person to service this appliance.

Installing your new appliance

Before using the appliance for the first time, you should be informed of the following tips.

Ventilation of appliance

In order to improve efficiency of the cooling system and save energy, it is necessary to maintain good ventilation around the appliance for the dissipation of heat. For this reason, sufficient clear space should be available around the freezer.

Suggest : It is advisable for there to be at least 75mm of space from the back to the wall, at least 100mm from its top, at least 100mm from its side to the wall and a clear space in front to allow the doors to open 135°. As shown in following diagrams.

Note:

● This appliance performs well within the climate class from **N to T** showed in the table below.

It may not work properly if being left at a temperature above or below the indicated range for a long period.

Class	Symbol	Ambient Temperature range (°C)
Extended Temperate	SN	+10 to +32
Temperate	N	+16 to +32
Subtropical	ST	+16 to +38
Tropical	T	+16 to +43

- Stand your appliance in a dry place to avoid high moisture.
- Keep the appliance out of direct sunlight, rain or frost. Stand the appliance away from heat sources such as stoves, fires or heaters.
- Do not place on carpet.

Leveling of appliance

● For sufficient leveling and air circulating in the lower rear section of the appliance, the bottom feet may need to be adjusted. You can adjust them manually by hand or by using a suitable spanner.

● To allow the door to self-close, tilt the top backwards by about 10mm.

Adjusting the door handle

Before you use the appliance, please check the refrigerator handle. If the handle is loose, please adjust them by using an Allen wrench in the clockwise direction until handle is securely in place. The handle is fitted with 2 screws.

Description of the appliance

View of the appliance

1. Upper cover of door
2. Corner cover
3. Flap cover
4. Twist ice maker
5. Ice storage box
6. Handle(back)
7. Upper freezer drawer
8. Middle freezer drawer(huge box)
9. Freezer door
10. Lower freezer drawer
11. Freezer door seal
12. Adjustable bottom feet
13. Hinge cover
14. Block cover
15. Upper cover
16. Glass shelf
17. Narrow freezer drawer
18. Shelf bracket(inside)
19. Cabinet

Note: Due to constant improvement of our products, your freezer may be slightly different from this instruction manual, but its functions and using methods remain the same. To get more space in the freezer, you can remove drawer(except lower freezer drawer), installation bracket and integrative ice maker/twistable ice tray.

Note: To get the best energy efficiency of this product, please place all shelves, drawers and baskets on their original position as the illustration above.

Display controls

All functions and controls of the unit are accessible from a control panel conveniently located on the door of the freezer. A keypad of touch buttons and a digital display allow easy configuration of features and settings in a simple and intuitive manner.

Important! Touch buttons require only a short press on a button to operate. The operation occurs when releasing your finger from the button, not while the button is pressed. There is no need for applying pressure on the keypad.

“Eco Energy” and “Child Lock” buttons require a long touch of a least 3 sec.

Please refer to those related sections of this Manual for detailed instructions.

The control panel consists of the indicating temperature area, four icons representing different modes and six touch buttons. When the appliance is powered on for the first time, the backlight of the display panel turns on. If no buttons have been pressed and the door remains closed, the backlight will turn off after 60 sec.

Controlling the temperature

We recommend that when you start your freezer for the first time, the temperature for the freezer is set to -18°C . If you want to change the

temperature, follow the instructions below.

Caution! When you set a temperature, you set an average temperature for the whole freezer cabinet.

Temperature inside the compartment may vary from the temperature values displayed on the panel, depending on how much food you store and where you place them. Ambient temperature may also affect the actual temperature inside the appliance.

1. Freezer

Press “Freezer” button to set freezer temperature between -14°C and -24°C as needed, and control panel will display corresponding values according to the following sequence.

2. Super Freeze

Super Freeze will quickly lower the temperature within the freezer so food will freeze

faster. This feature also helps to keep the vitamins and nutrition of fresh food for longer period.

- Press “Super Freeze” button to activate the super freeze function. The light will come on and the freezer temperature setting displays -24°C .
- In case of the maximum amount of food to be frozen, please wait about 24 h.
- Super freeze automatically switches off after 26 hours and the freezer temperature goes to below -20°C .
- When super freeze function is on, you can switch off super freeze function by pressing “Super Freeze” or “Freezer” button, then the freezer temperature setting or function mode will revert back to the previous setting.

3. Eco Energy

The function makes the freezer work in a power saving mode which is useful for when you are away on holiday by reducing energy consumption. Pressing “Eco Energy” button for 3 seconds until the light comes on.

- When the Eco Energy function is activated, the temperature of the freezer is automatically switched to -15°C to minimize the energy consumption.
- When the Eco Energy function is on, you can switch it off by pressing any button of “Eco Energy” or “Freezer” button. The freezer temperature setting will revert back to the previous setting.

4. Alarm

In case of alarm, “Alarm” icon will light up and a buzzing sound will start.

Press “Alarm” button to stop alarm and buzzing then “Alarm” icon will turn off.

Caution! When the freezer is turned on after a period of inactivity, the Alarm may be activated. In this case, press “Alarm” button to cancel it.

Door Alarm

The alarm light on and a buzzing sound indicate abnormal conditions, such as accidentally a door left open.

- Leaving the door of freezer open for over 2 minutes will activate a door alarm and buzzer. The buzzer will beep 3 times per minute for 10 minutes. Closing the door cancels the door alarm and buzzer.
- To save energy, please avoid keeping the door open for a long time when using freezer. The door alarm can also be cleared by closing the door.

Temperature alarm

This is an important feature that alerts users of potential damage to stored food. If a power failure occurs, for example a blackout in your area of

residence while you are away, the temperature alarm may be activated when power is restored to the unit. Alarm light will activate if internal temperature is warmer than -10° .

5. Power

If you want to stop using it, you can turn the appliance off by pressing “Power” button.

- When the refrigerator is working, you can switch the appliance off by pressing “Power” button for 5 seconds, meanwhile the display panel will be turned off.

Important! Do not store any food in the freezer during this time.

- When the appliance is power off, you can switch the appliance on by pressing “Power” button for 1 second, and the freezer returns to the previous temperature setting.

6. Child Lock

You can press the “Child Lock” button in case children touch the buttons

When the “Child Lock” function is activated, pressing the other buttons will not work except “Alarm” button.

- When the appliance is unlocked, you can activate the Child Lock function by pressing “Child Lock” button for 3 seconds. The “Child Lock” icon will be illuminated.
- When the Child Lock function is activated, you can switch off this function by pressing “Child Lock” button for 3 seconds. The “Child Lock” icon will be turned off.

Using your appliance

This section explains that how to use the freezer features. We recommend that you read through carefully before using the appliance.

Flap cover

- You can turn the flap cover upwards when you want to take out the food in the top chamber.
- Before you open or close the flap cover, you must lift it to the guide track first. Then, the flap cover can slide along the guide track to the top or the bottom.

Freezer Drawer

- It is used to store food which needs to be frozen, including meat, fish, ice cream, etc.

Twistable ice tray

Note: If the ice tray is used for the first time or has not been used for a long time, please clean it before using.

- The twist ice tray is used to make and deposit ice cubes. You should use it as follows.

1. Pull out the twistable ice tray from the installation bracket.
2. Pour water into the ice trays and the water level shall not exceed the maximum line.

3. Place the filled ice tray back to the bracket.

4. When ice cubes form, twist the knobs clockwise and the ice will drop into the ice box below.

5. Ice cubes can be stored in the ice box, if you need them, you can pull out the ice box and take them out.

Helpful hints and tips

Energy saving tips

We recommend that you follow the tips below to save energy.

- Try to avoid keeping the door open for long periods in order to conserve energy.
- Ensure the appliance is away from any sources of heat. (Direct sunlight, electric oven or cooker etc.)
- Don't set the temperature colder than necessary.
- Don't store warm food or evaporating liquid in the appliance.
- Place the appliance in a well ventilated, humidity free, room. Please refer to Installing your new appliance chapter.
- If the diagram shows the correct combination for the drawers, crisper and shelves, do not adjust the combination as this is designed to be the most energy efficient configuration.

Hints for fresh food

- Do not place hot food directly into the freezer, the internal temperature will increase resulting in the compressor having to work harder and will consume more energy.
- Do cover or wrap the food, particularly if it has a strong flavor.
- Place food properly so that air can circulate freely around it.

Hints for freezing

- When first starting-up or after a period out of use, let the appliance run at least 2 hours before putting food in the compartment.

- Prepare food in small portions to enable it to be rapidly and completely frozen and to make it possible to subsequently thaw only the quantity required.
- Wrap up the food in aluminum foil or polyethylene food wraps which are airtight.
- Do not allow fresh, unfrozen food to touch the food which is already frozen to avoid temperature rise of the latter.
- Iced products, if consumed immediately after removal from the freezer compartment, will probably cause frost burns to the skin.
- It is recommended to label and date each frozen package in order to keep track of the storage time.

Hints for the storage of frozen food

- Ensure that frozen food has been stored correctly by the food retailer.
- Do not exceed the storage period indicated by the food manufacturer.

Switching off your appliance

If the appliance needs to be switched off for an extended period, the following steps should be taken prevent mould on the appliance.

1. Remove all food.
2. Remove the power plug from the mains socket.
3. Clean and dry the interior thoroughly.
4. Ensure that all the doors are wedged open slightly to allow air to circulate.

Cleaning and care

For hygienic reasons the appliance (including exterior and interior accessories) should be cleaned regularly at least every two months.

Caution! The appliance must not be connected to the mains during cleaning. Danger of electrical shock! Before cleaning switch the appliance off and remove the plug from the mains socket.

Exterior cleaning

To maintain good appearance of your appliance, you should clean it regularly.

-Wipe the digital panel and display panel with a clean, soft cloth.

-Spray water onto the cleaning cloth instead of spraying directly on the surface of the appliance. This helps ensure an even distribution of moisture to the surface.

-Clean the doors, handles and cabinet surfaces with a mild detergent and then wiped dry with a soft cloth.

Caution!

-Don't use sharp objects as they are likely to scratch the surface.

-Don't use Thinner, Car detergent, Clorox, ethereal oil, abrasive cleansers or organic solvent such as Benzene for cleaning. They may damage the surface of the appliance and may cause fire.

-Do not use citrus based cleaners.

Interior cleaning

You should clean the appliance interior regularly. It will be easier to clean when food stocks are low. Wipe the inside of the fridge freezer with a weak solution of bicarbonate of soda, and then rinse with warm water using a wrung-out sponge or cloth. Wipe completely dry before replacing the shelves and baskets.

Thoroughly dry all surfaces and removable parts.

Although this appliance automatically defrosts, a layer of frost may occur on the freezer compartment's interior walls if the freezer door is opened frequently or kept open too long. If the frost is too thick, choose a time when the supply of food stocks are low and proceed as follows:

1. Remove existing food and accessories baskets, unplug the appliance from the mains power and leave the doors open. Ventilate the room thoroughly to accelerate the thawing process.

2. When defrosting is completed, clean your freezer as described above.

Caution! Don't use sharp objects to remove frost from the freezer compartment. Only after the interior is completely dry should the appliance be switched back on and plugged back into the mains socket.

Door seal cleaning

Take care to keep door seals clean. Sticky food and drinks can cause seals to stick to the cabinet and tear when you open the door. Wash seal with a mild detergent and warm water. Rinse and dry it thoroughly after cleaning.

Caution! Only after the door seals are completely dry should the appliance be powered on.

Troubleshooting

If you experience a problem with your appliance or are concerned that the appliance is not functioning correctly, you can carry out some easy checks before calling for service, please see below.

Warning! Don't try to repair the appliance yourself. If the problem persists after you have made the checks mentioned below, contact an authorised service repairer or the shop where you purchased the product.

Problem	Possible cause & Solution
Appliance is not working correctly	Check whether the power cord is plugged into the power outlet properly.
	Check whether the "Power" function is on by pressing the "power" button for 1 second.
	Check the fuse or circuit of your power supply, replace if necessary.
	The ambient temperature is too low. Try setting the chamber temperature to a colder level to solve this problem.
	It is normal that the refrigerator is not operating during the automatic defrost cycle, or for a short time after the appliance is switched on to protect the compressor.
Odours from the compartments	The interior may need to be cleaned.
	Some food, containers or wrapping cause odours.
Noise from the appliance	<p>The sounds below are quite normal:</p> <ul style="list-style-type: none"> ● Compressor running noises. ● Air movement noise from the small fan motor in the fridge compartment or other compartments. ● Gurgling sound similar to water boiling. ● Popping noise during automatic defrosting. ● Clicking noise before the compressor starts.
	<p>Other unusual noises are due to the reasons below and may need you to check and take action:</p> <ul style="list-style-type: none"> ● The cabinet is not level. ● The back of appliance touches the wall. ● Bottles or containers fallen or rolling.
The motor runs continuously	<p>It is normal to frequently hear the sound of the motor, it will need to run more when in following circumstances:</p> <ul style="list-style-type: none"> ● Temperature setting is set colder than necessary ● Large quantity of warm food has recently been stored within the appliance. ● The temperature outside the appliance is too high. ● Doors are kept open too long or too often. ● After your installing the appliance or it has been switched off for a long time.
A layer of frost occurs in the compartment	Check that the air outlets are not blocked by food and ensure food is placed within the appliance to allow sufficient ventilation. Ensure that door is fully closed. To remove the frost, please refer to cleaning and care chapter.
Temperature inside is too warm	You may have left the doors open too long or too frequently; or the doors are kept open by some obstacle; or the appliance is located with insufficient clearance at the sides, back and top.

Temperature inside is too cold	Increase the temperature by following the “Display controls” chapter.
Doors can't be closed easily	Check whether the top of the refrigerator is tilted back by 10-15mm to allow the doors to self close, or if something inside is preventing the doors from closing.
Water drips on the floor	The water pan (located at the rear bottom of the cabinet) may not be properly leveled, or the draining spout (located underneath the top of the compressor depot) may not be properly positioned to direct water into this pan, or the water spout is blocked. You may need to pull the refrigerator away from the wall to check the pan and spout.

Disposal of the appliance

Packaging materials

Packaging materials with the recycle symbol are recyclable. Dispose of the packaging into a suitable waste collection container to recycle it.

Before disposal of the appliance

1. Pull out the mains plug from the mains socket.
2. Cut off the power cord and discard with the mains plug.

Warning! Refrigerators contain refrigerant and gases in the insulation. Refrigerant and gases must be disposed of professionally as they may cause eye injuries or ignition. Ensure that tubing of the refrigerant circuit is not damaged prior to proper disposal.

	Correct Disposal of this product
	<p>This symbol on the product or in its packing indicates that this product may not be treated as household waste. Instead, it should be taken to the appropriate waste collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by the inappropriate waste handling of this product. For more detailed information about the recycling of this product, please contact your local council your household waste disposal service, or the shop where you purchased the product.</p>
